

**There's a secret I  
should let you in on....**

**You can actually use  
accounting to MAKE  
you money!**

**Keep reading to find  
out more...**

Hey good lookin'!

I'm Ruth Noel, founder of Tax Twerk, business leader and entrepreneur...

And today I've got some important questions for you...

- Do you often feel **OVERWHELMED** by all of the things on your to do list?
- Do you **DREAD** letters and reminders about your account deadlines?
- Are you **CONFUSED** about why you are being asked to pay fines for taxes?
- Are you **WORRIED** about why you are making sales but can't see enough profit in your business?
- Does the word "accounting" make you **FREEZE** in fear?

Well, you're not alone...

Self employed people across the globe consistently rate accounting and bookkeeping tasks as some of their least favourite duties; they are frequently time-consuming, tedious, and difficult to perform, yet absolutely integral to the functioning of a healthy business. But it doesn't have to be dreadful!

Today I'm going to give you **FOUR** fast & easy tips that you can implement in your business to [increase your cash flow](#).

## 1. Beautiful Technology!

Would you walk into a phone store and ask for the slowest & cheapest phone? I doubt it!

95% of creative business owners love to have the latest iPad, iPhone or Samsung Galaxy— so why wouldn't you want the same fast & awesome technology for your finances?

It doesn't matter if you're an IT consultant, property investor or singer - you're money should be treated to first-class treatment. And it doesn't matter if you're making millions, or hundreds.

Honestly, you can use this to send your invoices and make money.

This is why I recommend [Freshbooks](#) because its cutting-edge accounting software that frees up your time.

And we set up a [FREE trial](#) for you.

Check it out today:

## 2. Be Wary of Big Contracts!

It could negatively affect your reputation if you don't have the right systems in place before you take on a new client.

One of the most important things to me is 'efficiency' – I'll tell you why – if you use the fastest systems from the beginning you set the scene to make money faster.

What is the 'right system'?

There can be a range of different areas in your business that need an efficient system: from [sending out your invoices](#), time-tracking, managing your website or managing your customer enquires.

Choose only the best technology so that you can manage your workload with ease and efficiency. This will definitely save you from having to suffer 'information overload' or even worse, total chaos!

### 3. Cash-Flow!

Cash flow is the bloodline of your business. If you keep track of monthly expenses you will make better decisions for long-term growth. Consistent cash flow management is vital if you plan on building your life-long legacy.

Make sure you also keep a close eye on people that owe you money. This is often an untapped area that could increase your monthly revenue.

In other words, if you have debtors (customers owing you money) don't stay awake at night worrying about it, instead have a system where you follow-up regularly in a polite & assertive manner. For many businesses this can often bring in an extra 20-30% in profits every month!

## 4. Track the Big 9

Track 9 important financials for your business. This will give you greater power to make the best decisions.

That's a big list, but don't panic: You can take advantage of [software](#) programs or ask an accountant to track many of the following:

- Your Assets
- Your Liabilities
- What does it Cost You to Produce What You Sell?
  - What's it Costing You to Sell What You Sell?
    - What's Your Gross Profit Margin?
- What's the Value of Your Accounts Receivable?
  - What's Happening With Your Inventory?
- What's Your Average Collection Time on Accounts Receivable?
  - What Are Your Accounts Payable?

**Before you go...**

**Knowing what's up with your cash flow is essential to your business. But sometimes the figures can be difficult to understand.**

**YOU can achieve the success you dream about and love your business, accounting & tax savings!**

I've found that you can have a life and make money doing what you love. Building a business takes strategy, time management and passion. When those three things are optimised, you have fewer things to think about and more free time to make a difference and enjoy an incredible lifestyle!

I'd like to take this opportunity to invite you for a **FREE Consultation**, simply send an email to [ruth@taxtwerk.com](mailto:ruth@taxtwerk.com) and we can take action.

On behalf of myself and our team thank you for trusting us with your time.

Faithful in your success!

Ruth Noel
